Engaging in knowledge translation together

CO-CREATION CONFERENCE 2022

Collaboration opportunities

Share-Net International Co-Creation Conference

In 2022, Share-Net International will organize its third International **Co-Creation Conference** “Engaging in Knowledge Translation Together” with Share-Net Colombia as the 2022 host.

In the Conference we aim to translate knowledge and evidence into products that members of SNI and other participants can use to improve policy and practice around one or more specific SRHR theme.

2022 theme

Access to quality Information on Sexual and Reproductive Health and Rights

The access to information is part of the human rights. Quality information empowers communities and individuals, facilitates decision-making, and promotes citizen participation.

Unfortunately, access to information is mediated by socioeconomic, cultural, behavioral, and knowledge factors. This topic invite us to reflect, create, innovate, and generate products and strategies that facilitate access to information according to our contexts.

About the Conference...

All participants, including **researchers, practitioners, and policymakers**, engage in dialogues and are part of the co-creation process of knowledge products.

2022 Co-Creation Conference will be in a **hybrid format** and will take place on the week of the 4th July 2022 in Bogotá, Colombia and online.

The schedule will include:

- Power talks
- Co-Creation sessions in groups
- Session to prepare the Small Grants proposal
- Dissemination of last year's knowledge products

Collaboration Opportunities

To increase the incidence of the Co-Creation Conference and expand the capacity to generate knowledge products in Sexual and Reproductive Health and Rights.

What we need...

- Increase the **grants** amount for the development of proposals created at the conference (approx. 10.000 euros per product).
- Sponsor new **participants** worldwide (for the face-to-face version in Colombia) (approx. 3000 – 5000 euros per participant).

Benefits of becoming a donor or sponsor

Visibility:

The opportunity to promote the organization by putting your logo in our publicity materials and using our networks (websites, social media) as redirecting channels.

The contribution to a particular product will be recognized in the credits, including the opportunity to publish the product with the donor/sponsor logo and reach out to new public.

Benefits of becoming a donor or sponsor

Donation certificates and incidence:

We can assure you that working with us means investing directly in the solution of social problems related to health and the promotion of sexual and reproductive rights.

We expect that the products worked at the conference will be adaptable to any context, and we hope that they will be replicated or applied in different places by different organizations.

For your financial support, we can offer a “donation certificate” for those organizations that wish to invest directly in causes of social impact.
